The Effect of Process Documentation on Building the Capacities of EMPOWERS Stakeholders

Without Process Documentation (PD), a capacity building project would:

- ◆ have no clue to what enhances/hinders the empowerment of stakeholders;
- ◆ make no account of **how** success and failure take place; and
- ◆ therefore,
 - be a subject of internal and external forces;
 - be unable to make use of planning; and
 - leave nothing to resort to in a future investment of its approaches.

Process Documentation as an Information Function

WHAT..?

Process Documentation and the Public

Lack of Awareness

No Adherence

Water management inadequacies in the Middle East are partly an outcome of a long line of malpractices and misconceptions that draw on societal factors.

Without Process Documentation !?

Process documentation specialist
needs to be full of eyes!
