About the WASH in schools case studies

Developed by IRC International Water and Sanitation Centre under the SSHE Global Sharing project financed by UNICEF.

Over the decade a rich pool of experience and programming has evolved in school programs for water, sanitation and hygiene education, which we call WASH in schools or SSHE. Hundreds of millions of children are currently attending schools that have, in one way or another, become part of this ambitious effort to enhance the lives and life opportunities of young people around the world.

In the 1980s and early 1990s, these programs focused largely on construction. This usually meant building water points and toilets in schools. Current experience, however, has provided a strong evidence base on the crucial need to combine hardware (facilities) with software, that is, management, organization, capacity development, educational methodologies and promotion of hygiene behaviors. Participation of key stakeholders—teachers and educational staff, local government and community groups, parents and children – is seen as key to the success of these new WASH in school programs.

This collection of case studies examines both hardware and software aspects of WASH in schools and in different settings. The case studies focus in one way or another on four general themes: planning and management; actions in the school and teaching-learning; technology and design; and, scaling up or expanding WASH in schools while retaining its quality. The case studies are drawn from experience in Africa (Burkina Faso, Ghana, Kenya, Malawi, Senegal, Somalia, Zambia), Asia (Bangladesh, India, Nepal, Pakistan, Vietnam) and South America (Bolivia, Colombia, Nicaragua). The case studies provide insights into programs supported by UNICEF and also by other institutions such as the Aga Khan University, Caritas, Plan International and NETWAS International. Despite the breadth of institutional and national experience upon which the case studies draw, it must be noted that these 14 papers only provide a glimpse of the rich and often exciting experience in WASH in schools from around the world. Nonetheless, this is a ‘glimpse’ which will hopefully provide the reader with worthwhile insights into the current state of the art in school programming. At the end of each case study there is contact information for the reader seeking further information.

The case studies were prepared by the staff of the IRC International Water and Sanitation Centre in collaboration with Annemarieke Mooiman and Sumita Ganguly. The preparation of the case studies was overseen by Therese Dooley and Henk van Norden of UNICEF (New York) whose support is greatly appreciated.

All case studies are available at the WASH in Schools web site: <http://www.schools.watsan.net>
